

**You know that drinking water is good for you, but did you know that every system in your body depends on water?**

**Here are 10 reasons why drinking water is good for you and why you should make drinking 8-10 glasses of Kangen water part of your daily routine.**

- 1. Get healthy skin. Drinking Kangen water moisturizes your skin from the inside out. Water is essential to maintaining elasticity and suppleness and helps prevent dryness.**
- 2. Lose weight. Increased Kangen water consumption can help you control weight by preventing you from confusing hunger with thirst. Kangen water will also keep your body systems working properly, including metabolism and digestion, and give you the energy (and hydration) necessary for exercise.**
- 3. Flush toxins. By helping to flush toxins, appropriate Kangen water intake lessens the burden on your kidneys and liver.**
- 4. Reduce your risk of a heart attack. Researchers at Loma Linda University in California studied more than 20,000 healthy men and women and found that people who drink more than five glasses of water a day were less likely to die from a heart attack or heart disease than those who drank fewer than two glasses a day.**
- 5. Cushion and lube your joints and muscles. Water makes up a large part of the fluid that lubricates and cushions your joints and muscles. Drinking Kangen water before, during, and after exercise can also help reduce muscle cramping and premature fatigue.**
- 6. Stay regular. Kangen water helps prevent constipation by adding fluid to the colon and bulk to stools, making bowel movements softer and easier to pass.**
- 7. Stay hydrated, get energized, and be alert. On average, most adults lose about 10 cups of fluid a day through sweating, exhaling, urinating, and bowel movements. Even minor dehydration can cause impaired concentration, headaches, irritability, and fatigue.**
- 8. Regulate your body temperature. Perspiration is your body's natural mechanism to control body temperature. And to sweat, you need plenty of Kangen water.**
- 9. Reduce your risk of disease and infection. Kangen water can help prevent kidney stones and reduce your chances of getting bladder, kidney, and urinary tract infections. One study found that women who drank more than five glasses of water a day had a risk of colon cancer that was 45% less than those who drank two or fewer glasses a day.**
- 10. Get well. The traditional prescription to "drink plenty of fluids" when you're sick still holds strong. Kangen water can help control a fever, replace lost fluids, and thin out mucus.**

**With Kangen water you get a combination of hydration and good health that is sure to help you feel better and stay on top of your game!**
